Sydney's premier  
tree lopping company

**1800 800 206**

## Company History

Fast Call Trees is one of Sydney's premier tree lopping companies. Operating for ten years, our staff are very experienced in all aspects of tree removal. We aim to provide a reliable, prompt and professional service in accordance to all rules and regulations. We specialise in both domestic and commercial markets and our services include:

## Tree Removal

No job is too big or too small for our company. Our very specialised climbers and ground staff regularly tackle tree removals from three feet to over 150 feet in height. We use a series of ropes and pulleys to ensure we get the tree removed without any damage to property. A tree removal usually means that the tree is chipped and the stump is ground out using one of our stump grinding machines.

## Trim Ups & Pruning

We not only remove trees but also trim and prune overhanging branches, and branches which are either dead or diseased. Our specialist staff ensure that all trimming and pruning carried out is done with aesthetics in mind and to Australian Standards.

## Stump Grinding

Another area of expertise we offer is stump grinding. We have a number of machines designed to remove various size stumps in difficult positions.

The job is determined by accessibility. It involves grinding the stump away well below the surface to stop the tree from re sprouting. More often than not stumps need to be ground out to make way for fences, driveways and home extensions.

**Remove dead and unwanted stumps before termites move in!**

## Crane Work

Generally, when we can use a crane to remove a tree we will do so. More often than not trees grow in difficult to reach places. By using a specialist crane company we often minimise risk whilst saving time. There are many sized cranes that we source, in order to keep the job cost effective.

## Chipping

If you have storm damage, fallen branches or just have cut down a tree yourself and need to dispose of it, we also provide a chipping service to remove the unwanted foliage

## Land Clear

We also specialise in clearing trees from vacant blocks of land that are ready for construction.

## Mulch Sales

If you are a landscaper or simply need large amounts of leaf mulch to cover a garden bed, we also sell leaf mulch at very competitive prices and will deliver the mulch free of charge (*depending on the quantity and location*).

**All staff carry minimum requirements of work cover, RTA Traffic Control and Chainsaw licensing. Staff are also highly trained in the use of heavy plant and equipment.**
